

World Travel Dialysis Medical network

The World Travel Dialysis Medical Network (WTDM) is a medical facility, company, or organization that provides dialysis treatment at a high standard with the motto of accepting dialysis patients who wish to travel abroad with a spirit of hospitality. We, mainly medical organizations, will introduce you to the facilities in each country that are ready to accept travel dialysis patients for free. An interpreter can also be dispatched.

representative Medical Corporation Oyama Suginoki Clinic

Chairman Shinji Asakura

We started the overseas travel dialysis business in 2016 and have been active mainly in the Asian region where there are many foreigners visiting Japan. In particular, in South Korea and Taiwan, both dialysis patients perform overseas travel dialysis through us, and are fully enjoying overseas travel and returning to Japan. Although they are the same human beings, different countries have different cultures and different medical systems. We visit dialysis facilities in each country, talk with medical personnel, and build good relationships so that dialysis patients in each country can enjoy traveling abroad with peace of mind. With the motto of medical care that allows you to see your face even overseas, we have concluded a medical agreement (MOU) with a reliable facility. As the number of requests from overseas medical institutions and medical personnel who want to cooperate with our activities has increased, we have established the "World Travel Dialysis Medical Network" and developed together with the medical institutions around the world who support this project. I would like to let you. We look forward to your continued support of the World Travel Dialysis Medical Network.
